## 10<sup>th</sup> Maths - Chapter 3

This is Problem-2 from Exercise 3.1

1. The coach of a cricket team buys 3 bats and 6 balls for ‘ 3900. Later, she buys another bat and 3 more balls of the same kind for ‘ 1300. Represent this situation algebraically and geometrically

### Solution:

Given Data:

$$3x+6y=3900$$

$$1x+3y=1300$$

This can also be written as:

$$\begin{pmatrix} 3 & 6 & 3900 \\ 1 & 3 & 1300 \end{pmatrix} \quad (1)$$

$$R_1 \rightarrow R1 - 2R2$$

$$\begin{pmatrix} 1 & 0 & 1300 \\ 1 & 3 & 1300 \end{pmatrix} \quad (2)$$

now, Making  $R_2 \rightarrow R2 - R1$   
we get,

The final solution is  $x=1300,y=0$
